

1st WORLD GREXPO

FOUNDATION EXPO & TRADE FAIR

CONFERENCE, BUSINESS EXCELLENCE

AWARDS

Organized by

Waste to Wealth and Zero Waste

7th – 10th November 2025

 India Expo Centre, Greater Noida

.... Introduction

The 1st World GREXPO Exhibition Conference & Business Excellence Awards on Waste to Wealth & Zero Waste, scheduled from 7th to 10th November 2025 at the India Expo Centre, Greater Noida, provides a global platform to explore innovative solutions, exchange knowledge, and foster partnerships within the waste management sector. This event is organized by the MSME Chamber of Commerce and Industry of India (MSMECCII), a global business network dedicated to furthering the interests of businesses in various industries.

Benefit of Attending the Conference

Networking with Global Leaders

Engage with key players, thought leaders, and experts from the waste management, recycling, and sustainability sectors, offering unparalleled networking opportunities.

Learning from Industry Pioneers

Gain insights into cutting-edge technologies, emerging trends, and successful case studies of Waste to Wealth projects and Zero Waste initiatives implemented globally.

Business Expansion Opportunities

Explore new markets and potential partnerships with leading global organizations in waste management, recycling, and sustainability industries.

Stay Ahead of Industry Trends

Get first-hand knowledge of future regulations, policies, and innovations shaping the Waste to Wealth and Zero Waste sectors.

Sustainability Certification & Funding

Learn about government policies, funding options, and certification programs designed to support companies in implementing sustainable waste management practices.

CHALLENGES IN THE INDUSTRY

Technological Gaps

One of the most significant challenges is the lack of advanced waste processing technologies, especially in developing regions, which hinders the large-scale implementation of Waste to Wealth and Zero Waste initiatives.

1

Infrastructure Limitations

Inadequate infrastructure for waste segregation, collection, and recycling leads to higher landfill dependency, especially in urban areas where waste generation is substantial.

2

Regulatory Hurdles

Varying regulations across regions, coupled with weak enforcement mechanisms, make it difficult for industries to adopt standardized waste management practices.

3

Public Awareness & Participation

Engaging citizens and businesses in sustainable waste management practices remains a challenge, as many still lack awareness of the benefits and importance of these initiatives.

4

High Initial Investment

Transitioning to a circular economy and implementing Zero Waste strategies require significant investment in technology, infrastructure, and workforce training, which can be a barrier for smaller businesses.

5

KEY HIGHLIGHTS OF THE EXHIBITION

Innovative Technologies Pavilion

A dedicated space showcasing cutting-edge waste management and recycling technologies, including AI-driven sorting systems, energy recovery solutions, and eco-friendly packaging innovations.

Zero Waste City Models

Presentations and exhibits of cities that have successfully implemented Zero Waste strategies, sharing blueprints for urban waste management systems.

Circular Economy Workshops

Interactive sessions focusing on the practical applications of the circular economy, teaching businesses how to reduce waste and optimize resource usage.

Panel Discussions with Global Experts

Insightful debates and discussions with industry leaders on the future of waste management, regulatory changes, and business opportunities in Waste to Wealth sectors.

Business Excellence Awards

Recognition of companies and organizations leading the way in Waste to Wealth transformation, Zero Waste initiatives, and sustainability efforts.

Start-up Pitch Sessions

Opportunities for emerging companies to present their innovations in the waste management and recycling sector to a panel of investors and industry experts.

WHO SHOULD **ATTEND** ▶▶▶

Industry Professionals

Supply chain managers, logistics coordinators, warehouse operators, and procurement specialists who want to stay updated on the latest technologies and practices.

Manufacturers & Retailers

Companies looking to optimize their supply chain efficiency, reduce costs, and streamline logistics to improve customer satisfaction.

Tech Solution Providers

Businesses offering innovative technologies and services, such as AI, IoT, and blockchain developers, who want to connect with potential clients and partners.

Government Representatives

Policy makers and regulators from the logistics and transportation sectors who are interested in promoting sustainability and innovation.

Investors & Entrepreneurs

Individuals and firms looking for opportunities to invest in emerging technologies and innovations in supply chain, logistics, and warehousing.

Academia & Researchers

Scholars and experts researching supply chain models, logistics optimization, and the role of technology in the future of warehousing and transportation.
